

BOOK REVIEW

"Are We Our Past Lives?" is the distillation of Marie Gates search for spiritual development through studies of her own karma and past identities. She courageously and thoroughly explores nine past lives and candidly correlates personality traits and challenges that connect to her present life in meaningful and fascinating detail. Somewhat like a novel that requires setting up background that leads to a culmination, the pieces concisely fit together in the final chapters.

Well researched and written, this new book explains how karma works in all of our lives, and how it is possible to move beyond its binding contracts. An important addition to the library of anyone interested in a fuller understanding of the working effects of karma in present lives.

This is a fair and honest text based on the tape recordings of our sessions together. God bless all who benefit from Marie's efforts!
